

Simon's Movement Book

SUMMARY

This collection of useful movements has been prepared for personal use by the author.

It pulls together a number of sources:

- Basic principles for Mitchell movements and Switched Mitchell movements
- A number of 'standard' movements
(largely drawn from the EBU Manual for Duplicate Bridge Movements)
- Some useful movements used in local clubs
(often to achieve 24-boards for a variety of tables)

It is hoped that other Directors will also find this to be a useful public-domain reference.

Corrections and suggestions can be sent to chapeople@aol.com.

1 BASIC MITCHELL MOVEMENTS

1.1 Introduction

In straightforward Mitchell movements, there are two separate fields of competitors - those sitting N/S and those sitting E/W. Since the N/S and E/W pairs do not strictly compete against each other, the movement produces two winners; one for the N/S field and another for the E/W field.

After each round, the boards are passed down one table and the East/West pairs move up one table.

The number of rounds is the same as the number of tables [for a complete movement].

1.2 Odd Numbers of Tables

1.2.1 Notes

This is a simple movement that can be played with various numbers of boards per round to suit any situation.

1.2.2 Example movement for 7 Tables

Table 1			Table 2			Table 3			Table 4			Table 5		
NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set

1.3 Even Numbers of Tables with a Skip

1.3.1 Notes

If a standard Mitchell movement were used with an even number of tables, players would eventually meet boards they have already played. One method of avoiding this problem is to skip one table at the half-way point (between Tables 4 and 5 in the example below).

The downside of this approach is that players meet the first pairs again on the last round. To avoid this, the movement could be curtailed ahead of the last round, but then each pair would not play all of the boards (and the movement would therefore be incomplete).

The movement is not generally recommended.

1.3.2 Example Movement for 8 Tables

Table 1			Table 2			Table 3			Table 4			Table 5		
NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set
1	1	1- 3	2	2	4- 6	3	3	7- 9	4	4	10-12	5	5	13-15

1.4 Even Numbers of Tables with a Share and Relay

1.4.1 Notes

This movement is used to avoid any pair meeting more than once. A single set of boards is moved through a relay table at the halfway point (between Tables 4 and 5 in the example below).

The minor disadvantage with this movement is that boards are shared between the lowest and highest numbered tables. This should not normally be a problem.

A major advantage is the fact that all N/S pairs meet all E/W pairs once – the movement is perfectly balanced.

In the example below, boards from Table 2 are then shared and played at Table 1 and Table 8 on the next round. These boards then move to Table 7 on the following round.

1.4.2 Example Movement for 8 Tables

Table 1			Table 2			Table 3			Table 4			Table 5		
NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set
1	1	1- 3	2	2	4- 6	3	3	7- 9	4	4	10-12	5	5	16-18

6	7	16-18	7	8	19-21	8	1	22-24

2 ARROW-SWITCHED MITCHELL

2.1 Introduction

It is often desirable to have a single winner. This can be achieved using a Mitchell movement, so long as N/S plays the E/W hands on one or more boards for one or more rounds – this is termed an ‘arrow-switch’.

The fairest way to achieve a single field of results in any situation is the subject of some debate and lots of mathematics!

It is generally accepted that switching around 1 in 8 boards will achieve a fair result.

The EBU Manual for Duplicate Bridge Movements confirms the above and has some detailed guidance, but also endorses the following pragmatic approach:

Up to 11 Tables

Switch all tables on the last round

More than 11 Tables

Switch all tables on the last two rounds

2.2 Odd Numbers of Tables

2.2.1 Example movement for 7 Tables

Table 1			Table 2			Table 3			Table 4			Table 5		
NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set	NS	EW	Set
1	8	1- 4	2	9	5- 8	3	10	9-12	4	11	13-16	5	12	17-20
1	14	5- 8	2	8	9-12	3	9	13-16	4	10	17-20	5	11	21-24
1	13	9-12	2	14	13-16	3	8	17-20	4	9	21-24	5	10	25-28

6	10	5- 8	7	11	9-12
6	9	9-12	7	10	13-16
8	6	13-16	9	7	17-20

2.3 Even Numbers of Tables with a Skip

2.3.1 Note

No example is provided, since this movement should not be used. For an even number of tables, use the share and relay movement.

2.4 Even Numbers of Tables with a Share and Relay

2.4.1 Notes

Where there is a half table, the missing pair should be located as N/S at the highest numbered table, to avoid the need for sharing.

2.4.2 Example Movement for 8 Tables

Table 1			Table 2			Table 3			Table 4			Table 5

3 HOWELL MOVEMENTS

3.1 Introduction

Howell movements are preferred for a smaller number of tables and allow the greatest interaction between different pairs.

The movements selected here provide a sensible assortment for up to 10 tables, playing up to 28 boards.

For larger numbers of tables, a Mitchell movement is likely to be more convenient and easier to manage. For very large numbers of tables, it may be appropriate to split the tables into two [or more] sections.

3.2 Standard Howells

3.2.1 3 Tables, 25 Boards, 5 Rounds – Full Howell – M31 EBU26F3

Boards are kept on an assembly table and collected as required.

This movement is poorly balanced and all three tables share boards on the last round.

Table 1			Table 2			Table 3		
NS	EW	Set	NS	EW	Set	NS	EW	Set
6	1	1- 5	5	2	16-20	4	3	6-10

3.2.6 4 Tables, 28 Boards, 7 Rounds – Full Howell – M33

One relay between Tables 1 and 2; two relays between Tables 4 and 1.

This is a perfectly balanced movement.

Table 1			Table 2			Table 3			Table 4

3.2.20 8 Tables, 24 Boards, 12 Rounds – 3/4 Howell – M53

Four relays between Tables 8 and 1.

Allows players to meet 12 opponents and removes the need for sharing [c.f. switched Mitchell].
